

STOP THE SPRAWL—SAY NO TO THE DEVELOPMENT OF GREYSTONE!

The State has hired a commercial real estate broker to market 130 acres of the Greystone property to developers, including the historic 1876 Kirkbride Building. The State House Commission approved auction of this property in spite of the fact that State Law (2001, Chapter 345) requires any land or structures not needed by the new hospital be used for parks, farms, open space and historic purposes. We don't want or need any more subdivisions and strip malls! As residents of the areas surrounding Greystone and New Jersey citizens concerned with preserving open space and historic heritage throughout the state, we demand that the State abide by the Laws pertaining to Greystone, and respect the green space and historic structures present on the Greystone property.
